

# THE CHAMPION CHRONICLE

VOLUME 9

CHAMPION, (Alberta) THURSDAY, JUNE 10, 1926

## SAVOY CAFE

Our Ice Cream Parlor and Soda Fountain are popular these days and deservedly so. You can make no mistake in bringing your thirst or your hunger to us.

Leo. M. Roberts.

**Dr. R. R. McIntyre**  
DENTIST  
714 Herald Block, - Calgary.  
Will be at Champion all day Tuesday each week.  
Appointments may be arranged at Moffatt's Hardware.

**J. FRED SCOTT LL.B.**  
Barrister, Solicitor, Notary Public, of 219 Lancaster Building Calgary, will be in Champion every Thursday afternoon, in old Municipal office.

**Champion Lodge**  
No. 84.  
A. F. & A. M.  
G. R. A.  
Meets second Thursday in each month. Visiting brethren welcome.  
CHAS. McLEAN, E. F. CRAWFORD  
W. M. M. M.

## Three Candidates Going Strong

The provincial election campaign in Little Bow is warming up. With the U. F. A. nomination on Tuesday, putting the sitting member, O. L. McPherson in the field, the slate is complete and the three candidates are all busy lining up their prospective supporters. Hon. J. E. Brownlee spoke at the U. F. A. convention on Tuesday afternoon and at Carmangay in the evening. Conservative meetings have been held at Lomond and other points in the north and east parts of the riding. All three candidates are confident of winning this riding and a spirited contest is assured.

## To the Electors of Little Bow Constituency:

Having been nominated in an open convention of electors to contest the constituency of Little Bow in the interests of the Liberal party, I appeal to the electors for their support for a sound, progressive and economical policy for the Province of Alberta and for immediate examination of our provincial taxation system and its adjustment on sound business principles with a view to the reduction of taxation on the agricultural and other interests in the province in general, and for an honest effort to make income balance expenditures each and every year.

JAS. McNAUGHTON.

## Champion Loses To Red Cross

For eight innings there was a real ball game on Wednesday when Champion and Red Cross met on the local diamond. Then the fireworks commenced and the smoke has not cleared away yet. Seven runs were tallied for Red Cross where there should have been none and the game was over with a score of 10-2 against the locals. The batteries were LeBarge and Nelson. Hyatt and Reesor. There was a strong wind blowing but in spite of this the game was a good one until the aforesaid fireworks began. There was only a small attendance.

The members of the O. E. S. who attended the Grand Chapter of that order in Calgary, putting on part of the work, have returned home delighted with their trip and also with their own successful interpretation of O. E. S. work.

Mr. Johnnie Anderson has moved his family to Lethbridge where he has secured a permanent job, also playing in one of the leading orchestras. Mrs. Anderson will be missed, having been a great help in the community.

July 1st would appear to be going to bring a flock of big days. Champion has a big baseball tournament, Vulcan a varied programme and both Blackie and Nanton will celebrate.

Noel McLeod has been appointed enumerator for the Washington poll, J. G. Daugherty for Long Coulee and H. Cooper for Champion, and all are busily engaged in compiling the lists of voters.

One farmer contributed twenty-five hogs to H. E. Gill's carload shipped on Wednesday, receiving for them \$671.85. Since December last this same farmer has marketed \$2012 worth of hogs all fed on last year's tough wheat.

## Dressmaking

First-class Dressmaking or Plain Sewing. Will go out by the day or take at the house. Phone 42.  
MRS. H. J. COWELL

## Fashion Dictates

The Latest Dress for Men

Young or Old

## STRAWBERRIES!

Hood River will be in this week-end.

Season for Preserving Berries will be about two weeks earlier this year.

Get your orders in and not be disappointed.

**Lettuce, Celery, Radishes, Green Onions, Rhubarb, for the week-end.**

## PARIS GREEN

Pounds and Half Pounds

ALSO

## SPRAYIDE

**CHAMPION DRUG CO.**

Druggists and Chemists.

## Dry Weather; High Winds

At the time of writing (Tuesday) the high winds which have been so prevalent this spring are continuing with very little appearance of rain. It is estimated that twenty-five per cent of the crop has been practically destroyed by soil drifting. The remainder is looking well in most instances but rain must come at an early date to insure anything like a good crop.

Indications are that the Anthrax mines near Banff may be opened again after a lapse of 21 years, when the thriving little mining town closed down following a legal battle between owners of adjacent leases. It is understood that well known Alberta old-timers will capitalize a new company to open a new mine near the old site.

Arrangements for the Norse celebration to be held at Camrose in the first week in July are now being completed. Norsemen from all over Canada and from the United States are in attendance. Three special trainloads of visitors are expected. Special exhibits of products of the province will be set up.

Claiming the distinction of being the first woman returning officer to be appointed in a general election, Mrs. A. A. Baker, has been named to act in that capacity in the Medicine Hat riding in the forthcoming provincial elections.

The general strike cost Great Britain \$8,500,000 every hour it was in effect. Total estimated cost was \$1,700,000,000, or about \$200,000,000 a day. There were 5,200,000 workers affected by the strike.

It is stated officially that the Canadian National Railway will use 1,300,000 tons of Alberta coal during the coming year on its lines in Western Canada.

Construction of the big Spiller's Mill at Calgary is to be completed this year, and the mill is expected to be ready for operation in October.

Java is one of the most distinctly volcanic regions of the world, having 14 active volcanoes.

Legal advertisements, 15 cents per line for first insertion, 12 cents per line for each subsequent insertion.

Advertisements of Wanted, Lost, Found, Strayed, etc., not exceeding one inch, 50 cents for first insertion, 25 cents for each subsequent insertion.

Commercial rates on application.

THURSDAY, JUNE 10, 1926

## Political Suicide

There is more or less discussion in regard to "plumping" where the single transferable ballot is in use, and many different theories are being propounded. The more careful the investigation, however, the greater the certainty that the voter will vote more than his first choice. The following from the Calgary Albertan may perhaps be found interesting in this connection, and as this is by no means a matter of political controversy it is reproduced in its entirety:

The members of the women's political club in one of the ridings in the province have decided to vote No. 1 for their candidate, but not to vote No. 2 or No. 3 at all when there are three or more candidates in the running.

The members of the club are giving no assistance to their own candidate by declining to mark No. 2 and No. 3, and on the contrary they are very likely to do him and the party a very serious injury by taking any such action.

When the members of that club decided that they would not vote No. 2, they really decided that in case their own candidate was eliminated they would make no choice between the other two candidates. Their second choice could not be counted until their own candidate was eliminated. When their candidate is eliminated, if he should be, then the election will be the same to them as if they had no candidate and they had to make a choice between the other two or more candidates.

Here is where such a decision is likely to injure the candidate whose supporters favor any such unwise plan. If one side decides not to vote No. 2, the other parties are not likely to vote No. 2 for such a candidate. If Smith, Jones and Brown are running and the supporters of Smith decide not to vote No. 2 at all, then the supporters of Jones are not likely to vote No. 2 for Smith and the supporters of Brown are not likely to vote No. 2 for Smith. The outlook, then, for Smith, with the parties against him united with their second vote, is very serious.

While the supporters of a candidate do not injure his chances in giving their second choice to one of the other candidates, the chances of that candidate are very much injured if there are no No. 2 choices for him. The Liberals are likely to win many elections by No. 2 choices, but they will not win very many if any Liberal supporters make an unwise decision to vote no No. 2 choices themselves. Such a decision as that is in the nature of political suicide.

## Suitable Pasture

## For Growing Pigs

(Experimental Farms Note).

Pastures are desirable for economic pork production, especially for young growing pigs and brood sows. Pastures provide abundance of cheap feed and considerably reduce the proportion of concentrates required. Shade should be provided for pigs in pasture, as well as plenty of fresh water. The choice of pasture crops will depend largely on soil and climatic conditions.

At the Experimental Farm, Indian Head, such pasture crops as rape, oats, barley, sweet clover, rye, millet and various mixtures have been under observation for a number of years.

It has been proved to be one of the best pastures under test, from the standpoint of economical gains and the provision of succulent feed throughout the summer and fall months. A good stand of rape pasture is capable of carrying from fifteen to twenty pigs per acre.

Pall rye has also given good results as a hog pasture, and while possibly not so palatable as rape, it provides abundance of succulent feed early in the spring. Pall rye is to be recommended particularly as an early spring pasture.

The coarse grains, such as oats, barley, etc., sown alone or in combination, are satisfactory when used as pastures. To obtain best results with these mixtures, the pigs should be turned on when the growth is from six to eight inches high.

Every breeder and feeder of hogs should provide a suitable pasture for the growing pigs, brood sows and stock hogs, and thereby improve the health, thrift and condition of the herd, and, at the same time, reduce the cost of pork production.

Keep a clothes wringer well oiled, as the labor of operating it is then much less. Occasionally kerosene should be applied to cleanse the bearings, but in a general way it is better to use oil. Kerosene is of no use as a lubricant. In order to work the wringer with the least effort, stand in front of the machine and facing it.

## Why Not Deal

## With Your Neighbor

So many of us at times are so apt to pass up the local merchant—your neighbor—in the purchasing of your requirements whether large or small.

## LONG LOUIE CAFE

## The Place to EAT

Remodelled throughout, re-decorated and painted.

Private booths for those who desire privacy.

The Best Meals for the Money Served in Town.

Fruits, Tobaccos, Cigars and Soft Drinks.

## Velvet Ice Cream

## billiards

promotes good fellowship

A feeling of cordial fellowship always pervades every well conducted billiard room. Indeed every billiard table in a properly managed recreation center fairly radiates sociability and good fellowship.

Give billiards a trial on our tables. Meet more men. Broaden your field of opportunity. You will be impressed with the excellence of the equipment we have provided for the enjoyment of this fascinating game. You also will feel right at home when you sense the atmosphere of wholesomeness and refinement that always is so evident in this recreation center.

Address

Champion P. O. for  
Reservations and  
Terms.

Some of us do this without really giving any thought to the injustice which is being done to our neighbors—the merchants—who are a part in the building up of our community and a real part in your community life. They are established in your town with heavy investments in equipment and merchandise, aiming at all times to serve you economically and efficiently, paying their taxes towards the upkeep of the schools and other municipal requirements, but at the same time there are still those who insist upon sending their money away for the purchase of commodities which could be secured through the local merchants, without consideration for these local merchants who are a very important part of your community life and existence.

There are some who send their money away without ever giving the local merchant a chance to quote prices. We ask in all fairness, is this a fair and neighborly way to treat the merchants who have settled amongst you for your convenience, ready to serve you at any and all times? When times were hard and some needed accommodation, did they get it by writing or sending away for it? Did mail order concerns come to the rescue and say, "here we are ready to assist you, order what you want and we will charge it up until you are in a position to pay?" Oh no, the local merchant was the one solicited in time of stress. He was a neighbor; then, and as all real honest-to-goodness neighbors, was expected to help his neighbors by giving credit.

Now folks, just ask yourself this question. Are you playing fair, are you doing the right thing, are you helping to build up your community and are you really making any large or worth while saving by sending your money out of your district for commodities which can be purchased right at home?

Be fair at least by giving your local merchants a chance to do business

## Municipal District of Harmony, No. 128

## Public Sale of Lands under the Tax Recovery Act 1922.

NOTICE is hereby given that under the provisions of The Tax Recovery Act, 1922, and amendments thereto, the Municipal District of Harmony, No. 128 will offer for sale by public auction in the municipal office in the Village of Champion, Alberta, on Monday, the twenty-sixth day of July A.D. 1926, at 3 p. m. the following lands:

South East Quarter of Section Ten, Township Fourteen, Range Twenty-four, West of the 4th Meridian.  
South West Quarter of Section Twenty, Township Fourteen, Range Twenty-four, West of the 4th Meridian.

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificate of Title.  
Redemption may be effected by payment of the full amount of arrears at any time prior to the sale.  
TERMS: CASH.

with you. All they ask for is to be given a chance to figure on your requirements. That's reasonable and fair enough, isn't it?

## 28th International Eucharistic Congress Chicago - June, 1926

The 28th International Eucharistic Congress, to be held in Chicago, June 20 to 24, 1926, will be one of the greatest religious demonstrations that the world has ever seen.

With the sanction of the Ecclesiastical Authorities and, for the convenience of people of Western Canada, who will attend the Congress, the Canadian Pacific will operate special "Congress Trains," starting from Moose Jaw and Winnipeg. The Moose Jaw Special will leave 5:30 p.m., June 18th; the Winnipeg Special 8:15 a.m., June 19th. These specials will carry equipment of the latest type, and provide a fine, fast through service to Chicago.

Special sleeping cars will start from various points in the west and attached to the Congress Specials at Moose Jaw and Winnipeg.

## REDUCED RAILWAY FARES

Reduced railway fare tickets from stations in Western Canada will be placed on sale June 16th to 22nd, bearing a final return limit to July 2nd, 1926. These tickets will be honored on regular or Special trains.

The Canadian Pacific are in a position to make hotel reservations in Chicago, whereby passengers may complete every detail of their arrangements prior to departure. As those who intend making the trip should communicate as early as possible with the Ticket Agent in order that desired accommodation may be secured.

## A Want Ad. Will Do It!

**The European****Economic Situation**

(Royal Bank Monthly Letter).

Discouraging as are many of the features of the present European situation, no fair appraisal fails to show the steady improvement which has characterized the years since the war. Politically and economically the world is more stable than in 1919 or 1921. International trade is steadily increasing in volume, its dollar value is greater than before the war, although the decreased purchasing power of gold is such that this does not mean that a proportionate volume of goods is now in motion. Even though the standard of living abroad is not yet at 1913 levels, yet the spectre of starvation no longer haunts the nations of Europe. Peaceful settlements of political difficulties, and commercial treaties encouraging international commerce are now the order of the day.

Dark features such as the losses of the United Kingdom entailed by the recent strike, the long and acute period of depression in Germany, the revolution in Poland, the continual depreciation of French and Belgian money, the unsettled Italian situation, and the trade difficulties of the countries which formerly constituted Austria-Hungary, may be combined to produce a most discouraging picture. To an unfortunate extent nationalistic price is interfering with adjustments between nations, and partly staffs is preventing many countries from finding satisfactory solutions for their internal problems of taxation and budgeting.

Consideration of the actual trend of trade statistics presents evidence of greater improvement than might be anticipated after the discussion of such political events as those mentioned. The United States, for the moment, at least, is importing more goods than she is exporting. So long as the United States maintained an export surplus international financial balance was thrown more and more out of adjustment. The time must come when the United States imports a substantial amount more than

she exports and the present trend of her trade figures may be considered quite favorable. The money of the United Kingdom, Austria, Czechoslovakia, Hungary, Switzerland, Sweden, Russia, Holland and Germany have been stable for more than a year. Germany has accumulated gold reserves as large those held in 1913. Although rehabilitation of European finance and industry is proving a longer task than was anticipated, economic adjustments are slowly being achieved, and the prospect of an eventual return to economic prosperity is being more of a probability and less of a mirage.

A list of farms throughout the Champion district will be forwarded upon application, these including some of the finest properties in the district.

# COFFEE "is good COFFEE"

## Attract The Tourists

It is an economic truism that the imports and exports of a country must balance. That is to say, if a country imports more than it exports it must pay the difference in gold, which means that it costs money out of the country, that is, exports it. That is the balance maintained. On the other hand, if a country exports more than it imports then it has to pay, which means it imports gold. Thus the country whose exports in raw materials, natural products, manufactured goods and general merchandise exceed imports is a life character, and to whom the importing countries must therefore remit gold in order to balance accounts, can hardly feel but prosper and grow wealthy.

There are, however, what are termed inevitable imports. For example, Great Britain is obliged to import food and other necessities of life on a huge scale, and it not infrequently happens that British exports of coal and natural resources do not equal these imports in value. Thus the balance of trade is against Great Britain. But this is more than offset by the fact that the mercantile marine of Great Britain is the greatest trade carrying agency in the world and all countries pay freight to British ships. The carrying of British shipping constitutes a great but inevitable import, and these imports, like exports, add to the national income and wealth.

There is another class of imports which operates in the same advantageous way, and one in which Nature has equipped Canada to reap great benefits if the Canadian people make full use of their opportunities. We refer to tourist traffic. A tourist brings at least one thing with him—money. He spends it in travelling and hotel expenses, in expenses of recreation and pleasure, and in purchases in the country visited. Making Canada attractive from the standpoint of the tourist is, therefore, good national business. It will not only draw countless thousands of visitors from other countries, but will encourage Canada to spend their vacation in Canada, thus keeping their money at work for and in Canada, and in making them better acquainted with the Dominion and its enormous possibilities.

As already stated, Nature has done its part in richly endowing Canada with some of the finest scenery in the world and in making the Dominion a veritable sportsman's paradise. The Canadian climate, both in summer and winter, makes a strong appeal. But these things are not enough in this age. Tourists not only demand these things, but a marked change from the environment in which they live most of the year, but they insist on all modern comforts and conveniences, and go where they can be obtained.

Canada must, therefore, be made a country most for its road roots if it is to capture any large share of the annually tourist traffic which has now reached such large proportions. Canada must cater to the needs and tastes of all tourists by chains of good hotels, by bungalow courts, attractive summer and winter resorts.

Tourists will go where the greatest beauty beckons, the best roads lead, and reasonable comfort and necessary conveniences can be enjoyed. A motoring tourist along a road arriving at a town or village which presents a well kept and clean appearance, a park and residential life, both back and front, and with trees, shrubbery, grassy spaces and flowers, and where the hotel, no matter how small, is spotlessly clean and good meals served, will almost certainly stay awhile. But if the town or village is the opposite of these things, it is even more of a certainty that the tourist will fly right on.

It costs some money to make our prairie cities, towns and villages pleasant and attractive. But it takes more of time and patience than it does money to transform them as many have been and are being transformed into places of rest beauty and attractiveness. It is the development of the right type of community public spirit that really counts in the achievement of results.

The securing of a fair share of the growing tourist traffic of the continent is something that no Canadian city, town or village can afford to neglect. It is such business, and frequently leads to larger and unexpected business, that is why, because many a tourist with an pleasure heart is also keeping an eye open for investment and business opportunities.

And that making of the home town bright, clean and attractive is in itself paying dividends to all the townspeople in increased local pride and pleasure at home throughout the whole year.

## Must Fly British Flag

## High Altitude Affects Taste

Using Other Flags Alone Forbidden by Bermuda Law

Because so many houses in Bermuda were flying the United States flag, the Bermuda Government of Assen's law passed an act forbidding the flying of any flag unless the British flag is also flown. The United States flag was being displayed to attract tourists, it was ascertained, and not because the inmates of the house were Americans.

## Destructive Dust Explosions

No less than forty-five were killed, twenty-eight injured and \$100,000 property damage done by dust explosions in the United States in the last year. The explosions occurred chiefly in among manufacturers of wood and aluminum wares, starch, feed, coals, stoves, sugar.

## Fingerprints Fall

Score one against the Berillon system. Fingerprints of two prisoners in New York could not be classified by police because ridges of their fingers had been worn off during brickbattering operations.

The only innocent, harmless thing to which man has a natural aversion is worms and snakes.

# Children ry for

**Fletcher's  
CASTORIA**

MOTHER: Fletcher's CASTORIA is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Scolding Syrup, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of **Fletcher's** on every package. Physicians everywhere recommend it.

## Is Learning the Business

Help to Woolworth Millions Working in Long Island Store

Newspaper supplement editors will be glad to learn that Mr. Norman Woolworth, of the second generation in five and ten cent store business, is hard at work in the F. W. Woolworth store in Flushing, Long Island. Mr. Woolworth, whose income is said to reach \$250,000 a year, is serving out his time under one of those queer wills which make it incumbent upon the heirs to learn the business from the bottom up. He wears overalls in the Flushing store and is officially known as "head of stock."

When the six p.m. going rings a large Lincoln draws up to the door of the five and ten, and the pumpha descends its cylinders, with a liveried chauffeur in attendance. The help to the Woolworth millions gives James the Flushing and he is driven down the street a bit to one of the show places of Flushing, where he lives.—The New Yorker.

## They Worked a Miracle for Him

So Says Ontario Man of Dodd's Kidney Pills

Mr. H. Austin suffered with backache, headache, and was gradually losing strength. Collector, Ont.—(Special).—There is no more valuable belief in Dodd's Kidney Pills anywhere than in Mr. H. Austin, a well-known man here. He has good reasons for his belief in Dodd's Kidney Pills. This is to be seen from his own words. "I have had my kidneys and pains in my legs and back, and I have been unable to do any work for some time. After using six boxes of Dodd's Kidney Pills, I am now feeling much better. I thank Dodd's Kidney Pills, which I always take, for the cure now. I have gained in weight."

As already stated, Nature has done its part in richly endowing Canada with some of the finest scenery in the world and in making the Dominion a veritable sportsman's paradise. The Canadian climate, both in summer and winter, makes a strong appeal. But these things are not enough in this age. Tourists not only demand these things, but a marked change from the environment in which they live most of the year, but they insist on all modern comforts and conveniences, and go where they can be obtained.

Canada must, therefore, be made a country most for its road roots if it is to capture any large share of the annually tourist traffic which has now reached such large proportions. Canada must cater to the needs and tastes of all tourists by chains of good hotels, by bungalow courts, attractive summer and winter resorts.

Tourists will go where the greatest beauty beckons, the best roads lead, and reasonable comfort and necessary conveniences can be enjoyed. A motoring tourist along a road arriving at a town or village which presents a well kept and clean appearance, a park and residential life, both back and front, and with trees, shrubbery, grassy spaces and flowers, and where the hotel, no matter how small, is spotlessly clean and good meals served, will almost certainly stay awhile. But if the town or village is the opposite of these things, it is even more of a certainty that the tourist will fly right on.

It costs some money to make our prairie cities, towns and villages pleasant and attractive. But it takes more of time and patience than it does money to transform them as many have been and are being transformed into places of rest beauty and attractiveness. It is the development of the right type of community public spirit that really counts in the achievement of results.

The securing of a fair share of the growing tourist traffic of the continent is something that no Canadian city, town or village can afford to neglect. It is such business, and frequently leads to larger and unexpected business, that is why, because many a tourist with an pleasure heart is also keeping an eye open for investment and business opportunities.

And that making of the home town bright, clean and attractive is in itself paying dividends to all the townspeople in increased local pride and pleasure at home throughout the whole year.

## Vodka Has Bad Effect

Is Blamed For Growth of Looting in Soviet Factories

The re-introduction by the Russian Government of vodka of pre-war strength of 40 degrees is blamed by many in that land for the growing increase of looting and theft in Soviet factories.

The whole press, led by Economic Life and The Moscow Worker, is waging an unrelenting campaign. As worker correspondents from many factories point out, the decline began last fall, which seems to connect it definitely with vodka.

One writer from the Moscow state works says: "Unnecessary absences from work increased 25 per cent. after pay days, the reason being drunkenness," which seems to dispose of the alternative reason advanced by some quarters that the growth of Soviet industry has brought in a number of unqualified workers from the country, lacking their discipline and causing accidents through unfamiliarity with their machines.

## Studying Industrial Conditions

Eight English Workmen Sent To U. S. By London Paper

A unique delegation arrived in New York recently aboard the Carnarvon. They were eight British workmen. One was a patternmaker, one a boiler maker, one a blacksmith, one a tool maker, one a miller, one an ironworker, one a fitter, one a machine man. They came to the U. S. to study the conditions of the American workers, to examine working conditions, wages and industrial methods in the United States. The newspaper is paying all their travelling expenses, paying their wives (who remain at home) the men's usual wages, giving the men one hundred dollars each for extra clothes and fifteen dollars a week spending money, and providing each with a five thousand dollar life and accident insurance policy while on the trip.

Boys' Hotel At Edmonton

The Church of England opened a boys' hotel at Edmonton, the first of its kind in Alberta. The first lot of boys who will be cared for at this institution will arrive this month under the auspices of the church. A similar hotel has been operated in Montreal for some time and has met with considerable success in placing boys on farms in the provinces of Quebec and Ontario.

## Madame Lenin Disillusioned

Tired of Soviets Asks Permission to Settle in England

Madame Lenin, widow of the great Bolshevik leader, has had enough of the land of Soviets and has applied for permission to settle in England, according to a dispatch to the London Times. The Russian authorities are doing their utmost to restrain the lady, who is known there as Comrade Krupskaya, from carrying out her intention. Not, to be sure, that they are so enormously fond of her, as she has been a meretricious critic, but because they fear that she will devote her time in England to the writing of an expose of the Red movement that would be like a smashing thunderclap in the Bolshevik camp. It is plain, however, that Madame Lenin is disillusioned, as much as Emma Goldman and Alexander Berkman. Her desire to break away from Russia at this time would again show the ironical conflict between the dreams of the ideologist and the hard facts of reality.

Madame Lenin succeeds in getting out of Russia, which is after all no easy matter, as Trotsky discovered, she will be broken away from Russia at this time would again show the ironical conflict between the dreams of the ideologist and the hard facts of reality.

Madame Lenin succeeds in getting out of Russia, which is after all no easy matter, as Trotsky discovered, she will be broken away from Russia at this time would again show the ironical conflict between the dreams of the ideologist and the hard facts of reality.

### Strange, Romantic Love Adventures of the Flapper you know?

By H. L. GATES

Copyright 1925 by H. L. GATES

Published by arrangement with First Publications, Inc.

#### THE STORY THIS FAR

Joanna, pretty, ultra-flapper girl, is informed by her employer, Graydon, that an unknown man has given her a million dollars to spend as she wishes. There are no strings to the gift—no conditions to be met. She is not even to know the name of her benefactor. She endeavors in vain to learn more from banker Deighton, where she meets his nephew, Brandon, a man-about-town, who helps her write her first check and tells Joanna that he intends to make love to her. Brandon gives her a million dollars, but by the fact that her shop girl companions and the merchants with whom she deals, spending her new found fortune, believe her to have gone the limit in securing the money, she returns home that night expecting to meet John, her hopelessly "old-fashioned" girlhood sweetheart.

#### CHAPTER VI.—Continued.

"Miss Twenty-seven" had become the slender scrawl of a hothouse flower, all perfume, cottons and delicate color, beneath her silk and delicate variety grey; smart grey tail-tail that fell straight from underneath her shoulders, but hugged her hips; skirt that dropped into straight lines without a touch of trimming or variant pleats or creases; a thing that was infinitely and expensively "avenue"; grey sheer hose of a quality that echoed into the very souls of George and the rest! Slippers, slippers that were wondrous things of white with the sheen of grey velvet! A ravishing little hat, grey with a splash of scarlet at the side. George estimated the very simplicity of that, but as next door to being priceless.

A single flower, but that an orchid, nestled at Joanna's waist.

There was an immediate label of roses, punctuated presently by the sharp reminder of an impatient customer that there were those with to be attended to.

"So you weren't fired after all?" George exclaimed when she had summoned her wits. "Here you're—"

### WOMAN COOL BUT HARDLY WALK

Mrs. Horn Tells how Lydia E. Pinkham's Vegetable Compound Restored Her Health

Hamilton, Ont.—I have taken Lydia E. Pinkham's Vegetable Compound without it now, I could hardly walk. I was all run-down and could hardly get on my feet. I was told by a friend to try your Vegetable Compound and by the time I took two bottles I was beginning to get around. I took two bottles in all, and now I am all right again and doing my own work. I have six grown-up boys, for so I have plenty to do. I also used Lydia E. Pinkham's Sanative when I think it is good. But I owe my health to the Vegetable Compound. I think if more of it was used women would be better off. I would not be without it if it cost me my life. Mrs. N. H. Horn, 28 St. Matthews Avenue, Hamilton, Ontario.

Do you feel broken down, nervous and weak sometimes? Do you feel like taking at such a time, or do you feel like taking regularly and permanently, will relieve this condition.

"I've got to wear your dress, too, little daughter! That black dress you affect is all right, I guess, but when you get the real things that have come from the hands of the makers, why you don't need to wear them to skimpy to look your best. If you don't know what I mean say 'I won't' and think it over. George! I'm giving you something straight!"

"So straight it sounds like a sermon to me," the other girl retorted. "And this lady Sunday, either! But you've got a license all right, I suppose. It was a sensational finish, but Joanna preferred not to take it up."

Joanna heard Mrs. Adams through half open doors tell other girls in the house that the drawing room has been assigned for the evening and heard the rampant rejoinders that there were lots of other wide open spaces in the world anyway. After a while, when she had resigned outright one of her new gowns to George as an installment of tomorrow's promise, she thought she heard John as coming in the front door. She listened eagerly, lips, eyes shining and body trembling, but there was no call from Mrs. Adams. She felt again to examine herself in her bit of mirror, twisting and squaring to give as much as she was possible of her personality, soft and shimmering evening gown, without which her throat lifted round and round. She'd always been without sleeves and a fairly low neck, but each of them, modest as they had made her hungry for something real—something that really was her own. At last! What the feel of that dress was to Joanna nobody but Joanna would know. She wouldn't admit it herself, and it's the one thing that can be painted on a canvas or put into music, but never said in words.

She heard the rattle of the door-bell. She slipped to George to be quiet and opened her door an inch or two. She heard Mrs. Adams uttering an inquiry, and the voice she heard then was not John's, but the quiet, modulated tones of the man she had met at the bank—Brandon.

"She heard Mrs. Adams' confusion," "Why, yes, I'll tell her you're asking for her," the man said. "I don't know whether to put you in the parlor to wait or not. There's someone—her friend—in there. I've just been talking to him about her. She doesn't know who he's here yet."

And then Brandon's voice rose: "I am sure you will not be unkindly, but her friend and I. We'll talk about her, too. Will you be so very kind as to wait? She is very young, she's flowers. I have brought her some flowers. You will see her soon enough to hand them to her?"

Joanna heard Mrs. Adams herding him into the "drawing room only" and in her diffident, blundering way mumbled an introduction. So John had come in. She was right, she thought she heard him. And he and Mrs. Adams had been talking together all this time in muffled whispers so she would not know what they said. And now Brandon, a man who she thought knew what was a secret from her, had come, as he had lately threatened, and John would see him. Brandon and John! She wanted to keep John! She'd never realized before how much.

She didn't know why, but Joanna was afraid as she went downstairs; so soft and young and beautiful in her early new gown, and so dressed from the day's events, but afraid.

(To be continued.)

**Produces Cold Light**  
A demonstration of a method of producing cold light was given recently by a scientist at Manchester, Eng. By the process the electricity is changed to light without the luminous substance being heated in any way.

You can measure civilization's progress by the statues it erects to those it once called cranks.

She had thought of going up to tell Mr. Graydon she had and to ask him some more wild questions, but she forgot.

Why did everyone, even George, who out of some very definite understanding between them, should know her pretty well—why did all of them think things? What was wrong with the world, the whole world? Was there no one who really knew about a girl? Not even among other girls?

Something very profound was sitting down below the surface of the deep brown eyes of Joanna, but it was still too abstract a confusion for her to grasp with. She was sitting again when she reached home. The world for some unfathomable reason had picked her out to be good to.

When George arrived, breathless from her rush from the store, Joanna was in the midst of her feverish unpacking of boxes. She had forgotten her things and George had forgotten her things apparently. She plunged in to help, vainly trying to get to the bottom of her questions of delight before the procession of arriving new things. Whatever pertinent queries she had treasured up against opening to voice them were effectively silenced when Joanna remarked:

"Lay off tomorrow, George. Get sick or have a bolt or something. I have to take you to some place I go today and buy you some real things—whatever you want. But

because it cleans, invigorates and preserves the skin, scalp and hair. Used daily, assisted by Cuticura Ointment when needed, it prevents pre-clogging, pimples, blackheads, and all annoying irritations.

#### A Pessimistic Picture

Fears Women in United States Will Soon Be Ugly

Intelligence and beauty go together, and because the most intelligent section of the population is having small families, the American women is becoming ugly, states Albert Edward Wisniewski, scientific writer. The most intelligent 25 per cent of the population are having only one or two children to a family, while the least intelligent, and ugliest, 25 per cent are producing three or four.

"If this process goes on, beautiful women will soon be remembered only in pictures," he said. "And when beauty, daintiness, intelligence, morals, health, sanity and longevity all go with it, because all are linked with beauty."

#### Little Helps For This Week

Not slothful in business, fervent in spirit, serving the Lord—Rom. xii, 11.

Unto my life another day, And give me leave to walk abroad in my law's way.

Remember that if the opportunities for great deeds should never come, the opportunity for good deeds is renewed for you day by day.

The thing for us to long for is the goodness, not for glory—Frederic W. Farrar.

#### Likely in Canada Too

Large Percentage of Earnings Spent on Motor Cars

It is only 25 years, since the automobile emerged as a commercial product, and today the manufacture of motor vehicles takes first place among American industries. The bureau of industrial technology estimates our annual automobile bill at \$1,000,000,000. This makes an interesting comparison with the total business of our retail stores, which has been estimated at \$25,000,000,000. Computations of this sort are obviously subject to a wide margin of error, but it is safe to conclude that, roughly, for every dollar spent for food, clothing and house furnishings, we spend 40 cents on motor cars and their upkeep.—New York World.

#### Asparagus Used Centuries Ago

Culture of Plant Introduced into England During Reign of William III.

Before the days of Henry VIII, vegetable gardens were not made in England. Asparagus, with its remarkable properties, was used as a food 200 B.C., and though our Tudor ancestors ate the whole of the stalks, with spices, the culture of this plant was not introduced until the reign of William III, when Sir William Temple brought it from the Hague. The King, visiting Sir William at Moor Park, showed Jonathan Swift, the secretary, how to eat it in Dutch style. "Kind William always ate the stalks whole," said Swift.

Mina's Liniment for backache

A man is proud of things he thinks he can accomplish that of those he really can.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator for always get it at hand, because it proves its value.

It takes forty years to make a military machine; four years to break it; a million years to learn better.

Use Mina's Liniment in the stable

#### Could Not Remember

Wife's Christian Name Addressing Her

In certain parts of rural England it is uncommon for a man to address his wife by her baptismal name. Illustration of which Thomas Hardy, the novelist, recently told the following story. An elderly farmer called in a lawyer and explained that he wished to make his will. The lawyer took out his fountain pen, and prepared to receive his client's instructions. "I'll leave all my brass to my wife," the farmer said. "We've been married thirty years." "What's your wife's Christian name?" asked the lawyer, making a note of the request. The farmer scratched his head, thought hard for several seconds, and finally said that he couldn't remember. The lawyer thought of a plan that would spur his memory. "Walk to the door," he suggested, "and about up stairs as if you were calling her." The farmer did, and shouted, "Alice."

#### Working Under A Mistake

Colored Pastor Had To Do His Own Collecting

"Brother, please," said the pastor, sadly, surveying his dark flock with a face full of woe. "When I done took this congregation I was promised a salary. This salary was to be paid in chickens. I have been expounding scripture for two months, and now I wonder if it's worth a chicken." There was a long silence.

Then a giant dozen arose and said: "Brother Jones, we are most heartily sorry that you have been the victim of a mistake. You have misunderstood the method on which our rectors are paid. We provide you with de lantern and two gunnysacks and ten y' collect's dat salary y' self."

#### Microscopes Used In

Detection Of Crime

Reveals Many Things Naked Eye Would Never See

While Sherlock Holmes has been depicted as an inveterate user of the microscope—or common magnifying glass—his work of the kind was as nothing to that now being done in New York in the use of magnifying instruments in the detection of crime. Pericles of the law and list almost too fine to be noticed with the naked eye have been linked with scenes of crime, either falling taken from the persons of suspects.

#### Women Learn English Driving

A school has been opened at Belgrade to teach women to drive steam locomotives. Women pupils do not wear the skirt, which in fact they wear rather long, but practical work probably will make graduates adopt trousers and overalls, as so many women did in France when automobiles were to take up some of the men's professions.

#### Use Found For Locusts

Oil Makes Lubricant For Watches and Delicate Machinery

Oil has been found for the locusts which destroy vegetation in South Africa and other countries. The insects are crushed in quantities and fed into presses which crush them and squeeze out an oil that is used as a lubricant for watches and other delicate machinery. The remaining solid matter is used in rubber and turned to use as poultry feed.

#### THE ONLY MEDICINE

BABY HAS HAD

Is What Thousands of Mothers

Say of Baby's Own Tablets

Once a mother has used Baby's Own Tablets for her little ones she will say nothing else. Experience teaches her that they are the only medicine she has ever had and she will tell you that for another. The Tablets never fail to be of benefit—they cannot possibly do harm as they are guaranteed to be free from all injurious drugs.

Concerning Baby's Own Tablets, Mrs. Russell Hill, Norwood, Ont., says: "I have always had a good word to say for Baby's Own Tablets. I have given them to our baby girl. In fact they are the only medicine she has ever had and I am proud to say that she took second prize at our baby show. She is eleven months old and weighs 22 pounds. No mother whose child is healthy or ailing will make a mistake in giving it Baby's Own Tablets."

Baby's Own Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### Riches and Luck

The fact that happiness is most powerfully in the great number of poor people who become rich, and the great number of rich people who become poor.

And it is never good or bad luck; it is good or bad conduct.—E. W. Howe's Monthly.

### Insulated Walls Cut Coal Bills

To heat a building economically you must keep cold and dampness outside and warm air inside. Both of these duties are efficiently performed by Hercules Building Paper. Being absolutely impervious to winds and moisture it reduces heating expenses.

Hercules Sheathing is made from the highest grade wood pulp and reinforced with a protective coating which will endure as long as the walls.

We will send samples and prices to builders upon request.

## Modern Highway Across Canada

All-Canadian Road From Halifax To Vancouver Before End of Year  
Four different governments have at last heeded the call for an all-Canadian highway stretching from Halifax, N.S., to Vancouver, B.C. Four governments have met on equal ground, and each has pledged the completion of the necessary work. Ontario says: "We are already constructing the remaining link." Alberta is to have its link ready this year. The Dominion Government, speaking for Jasper National Park, states that it will link up with Alberta this year, and British Columbia, the last to fall into line declares, "When the Jasper highway reaches Teke Jumbo Creek, British Columbia will have a road ready to carry it on to Vancouver." It will be possible to tour across Canada on a modern highway before the end of the present year.

## Stone Age Weapons Efficient

Recently Discovered in England Have Edge Keen As Razor  
An arsenal was discovered some months ago in the neighborhood of Chatham, England, believed to have been used by cavemen thousands of years ago. Two local men made the discovery about sixteen months ago, and since then about four thousand flint arrowheads, flint axes and scrapers, and other worked flints, have been taken out of the dump. The tools and weapons, although they belong to the earliest period of the Stone Age, are wonderfully efficient. Some of the edges are still almost as keen as razors.

"IDEAL Fashions" by Fashionable

Dr. A. G. Doughty, Dominion architect, has been appointed chairman of the public works commission, according to an announcement made in the Canada Gazette.

## WORLD HAPPENINGS BRIEFLY TOLD

A new dish with all the taste and appearance of ice cream but composed principally of pea powder, is the invention of a San Francisco chemist. The customary dominos they dinner in London this year has been eliminated in favor of a combined reception, dance and concert, to be held in the Canadian building.

Str. Herbert Ames, Montreal, chairman, has been appointed chairman of the public works commission, according to an announcement made in the Canada Gazette.

About 1,300,000 tons of Alberta coal will be used by the Canadian National Railways in Western Canada this year, according to R. C. Vaughan, vice-president of the Canadian National.

Government terminal elevators in Canada earned a total of \$769,640 in the last crop year and spent \$240,466 in operating expenses, it was stated in the House of Commons in answer to a question.

New Zealand, always a popular borrower in London, asked for another loan, this time of the million pounds, and the loan was subscribed ten times over within an hour. The loan is at five per cent, and the bonds were offered at the price of 98½.

The "Prohibition Canada" exhibition, whose primary work is declared to be "to help Canadians that they might help themselves" was officially opened in the Hamilton armory by Hon. Harry Cockburn, lieutenant-governor of Ontario.

Legislation forbidding the removal of Indian relics from British Columbia, and designed to prevent their mutilation by vandals will be introduced at the present session of parliament according to word received from Ottawa by the native sons of British Columbia it is announced.

A mileage book to so interesting that a traveler is always sorry when he reaches the last page.

About the only people who get satisfaction by going to law are the lawyers.

## A Health Item Of Interest

A New and Effective Method of

It will be good news to our readers that they now have available a most effective means of promoting health in the home by eliminating the diseases that are transmitted by flies and mosquitoes. Flit, the remarkable insecticide which has been perfected by the Standard Oil Company of N.J. is now obtainable in Canada at almost any drug store, hardware store or grocery store.

For years the research laboratories of the Standard Oil Company of N.J. were engaged in developing a type of insecticide that would be clean, safe and easy to use.

At last their expert entomologists and chemists succeeded in perfecting a thoroughly scientific product superior to the old methods of killing insects. In that it kills all of them that come anywhere in the neighborhood of the application of the spray, and that is very quick and sure in its action.

Having found this wonderful answer to the insecticide problem, they called it "Flit," and under this name it has attained a large sale in the United States, and is in fact widely recognized as an aid to home health, by reason of those qualities which make it sure death, not only to flies and mosquitoes, but also to gnats, ants, bed bugs and roaches. This wonderful product is now on sale in all parts of Canada.

Sprayed into cracks and crevices where insects hide and breed, Flit destroys both the insects and their eggs. An added advantage is that Flit will not stain the most delicate fabrics. This has been proved by extensive tests.

**Wins High Art Award**  
A Japanese girl, handicapped by the loss of both arms, but possessed of great courage, astonished Tokyo art circles by carrying off the honors of the "Exposition" school exhibition. Holding specially constructed brushes between her teeth, Miss Yonoko Yamaki, the armless artist, has for several years painted oil, the decorative cash worn by all Japanese women. Some of her work at the exhibit sold for as much as \$500.

**Always Ready and Reliable.**—Travellers all praise arising from information can be received with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is quickly soothing. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

**Plans Aerial Expedition**  
Engineer Antonio Pauli, of Buenos Aires, has presented to the ministry of the navy plans for an Argentine aerial expedition to the South Pole and an extensive scientific exploration of the Antarctic continent.

A corrad is a man who knows he is wrong and refuses to admit it.  
All men are equal before the law, but not before the mother-in-law.

## ON THE AIR What is Doing in the World of Radio

There has been quite a boom in wireless sets in Paris since the general strike in England, especially among English-speaking residents who used them to get their strike news.

Many persons are suffering from radio disease because they listen for many hours without removing the ear phones. An ear specialist advises the use of loud speakers.

Com.—The radio will never take the place of newspapers.  
Domest.—Why?

Com.—You can't start a fire or line a carpet with a radio set.

Many broadcasting stations are now making public their advertising rates. One United States broadcast station has a rate ranging from \$20 for a quarter of an hour during the day to \$120 for one hour at night.

Tauhinne, the famous priest and scientific electrical engineer, who is noted in France for his inventions as well as his sermons, has just completed what he claims is the first really perfected loud speaker for crystal sets.

Air conditions for radio are best in February, the next best months being March, January and November.

Commercial wireless service inaugurated at Rio Janeiro, Brazil, is in touch with London, New York, Paris, Berlin and Rome.

Soula Radina, radio artist, has insured musical manuscripts for \$100,000, the first time ever.

Electric power men from all parts of Wisconsin have pledged themselves not only to eliminate power line interference of radio reception, but to assist the radio set owners in their quest for the source of much of the other troubles such as "static" ray machines, X-rays and such.

When a radio receiving license is granted to a listener in Japan, his set is used to receive length of the Tokyo Municipal Broadcast Station and then sealed so that no other station may be tuned in. It is reported that this is done in order that no radical ideas can be picked up if put on the air by secret broadcast stations.

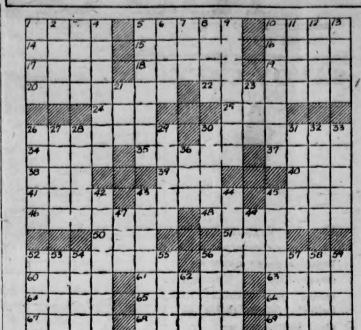

Many people have the mistaken notion that the resistance of headphones is a measure of their quality. Actually, radio headphones of 2,500 ohms resistance may be no better than others of 5,000 ohms resistance. The resistance is determined by the length, size and kind of wire used in their construction. Their performance is a matter of proper engineering design and the use of good materials.

**The Oil for the Athlete.**—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of joints and strengthens the nerves so that they may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

**World's Poultry Congress**  
The Belgian minister of agriculture has named officials to represent to the World's Poultry Congress at Ottawa, July 27 to August 4, 1927. They are: M. Maenhout, member of the House of Representatives, and president of the National Federation of Poultry Societies of Belgium; Lomberg, M. Pullicke-Roman, Y. editor in chief of the Journal Chasse et Pêche; and M. Heyndrickx, Ach., a member of Brussels, Leidsberg.

**To Develop More Power**  
Two million dollars will be expended by the Winnipeg Electric Company and its subsidiaries in making the necessary provision to obtain and utilize power from the hydro-electric plant at Great Falls during the next eight months. It is announced that a considerable proportion of this expenditure will be represented by large power machinery, it is stated.

## CRISIS IN EGYPT IS THE CAUSE OF GRAVE CONCERN

London.—With a ministerial crisis pending in Egypt and having in mind the acquittal of the alleged assassin of Sir Lee Stack, British aide of the Egyptian army in 1921, Great Britain has informed the Egyptian Government that it reserves "complete liberty of action."

The British Government is backing up this notification with the dispatch to Alexandria of a warship from Malta, demonstrating this, however, as merely a precautionary measure for the protection of British and foreign interests. The most important question at issue is the Egyptian premiership, which recent reports asserted was likely to be taken over by Ziaul Pasha, leader of the Nationalist party, whose partisans in the late elections carried a majority of the seats in the assembly. Ziaul Pasha is not acceptable to the British Government, and the position has been relieved by late advice that Ziaul has, willingly or unwillingly, withdrawn his candidacy and that the new premiership is likely to be held by Adly Yehia Pasha, constitutional liberal.

The cabinet under Ziaul Pasha, these advisers add, has not yet resigned, nor has Adly Yehia definitely accepted the premiership. Not much news from Egypt has reached London for some time, and the position, therefore, is somewhat obscure, but for the present there is nothing to suggest important developments.

## War On One Big Union

Winnipeg Mayor Says Means Must Be Found To Dissolve Organization

Winnipeg.—Open warfare between the One Big Union and a view to its ultimate extermination, was declared by Mayor R. H. Webb, of Winnipeg, in addressing the annual meeting of the industrial development board here.

The organization, which is regarded as the left wing of the labor movement, has its headquarters in Winnipeg.

Mayor Webb declared some means must be found to dissolve the O.B.U., which, he charged, was "undermining progress and development in the city." He criticized the organization for its refusal to grant the street railway men's union of the organization a board of conciliation in an effort to settle the present deadlock between the Winnipeg Electric Railway and the men. The traction company has refused to recognize the union or negotiate a new agreement with their employees who are affiliated with the O.B.U.

## To Raise New Loan

Dominion Loan Not Exceeding \$150,000,000 To Be Sought

Ottawa.—Authorization to raise a Dominion loan not exceeding \$150,000,000 will now be sought from parliament by Hon. J. A. Robb, minister of finance. The loan is for the purpose of paying, redeeming or otherwise disposing of the whole or any part of loans or obligations of Canada and for public works and general purposes.

The Dominion Government has \$35,000,000 in two-year notes maturing October 1, and \$50,000,000 in two-year notes maturing November 15.

## Report Foreign Priests

San Salvador, Republic of Salvador.—The Guatemalan Government has deported a number of priests charged with interfering in politics. The government also has issued orders forbidding dissenting priests from entering the country and prohibiting the functioning of foreign priests without special government permits.

## Francis-Syrian Treaty

Paris.—A heavy dispatch from Constantinople says that the French ambassador, Albert Sarraut, and Tewfik Rashed Bey, foreign minister of Syria, have signed a Franco-Syrian treaty. The treaty was negotiated several weeks ago by Henry De Jouvenot, French high commissioner for Syria.

## Arrest U. S. Diplomat

Honolulu.—A special dispatch from Tokyo to Houchi Shiba, Japanese newspaper here, says that O. K. White, a member of the United States embassy staff in the Japanese capital, was arrested while taking photographs in the Sasebo naval base.

## May Be Exiled To Corfu

Paris.—The Petit Parisien quotes a Paris (Morocco) newspaper as stating that Abdul-Krim, leader of the Moroccan chief, will not return to Morocco, but may be exiled to Corfu.

W. N. O. 1622

## Protest From Livestock Board Says China Resents Foreign Interference

Open Letter Is Sent To The Minister of Agriculture

Winnipeg.—The board of directors of the Winnipeg Livestock Exchange has sent an open letter to Hon. W. R. Motherwell, minister of agriculture, in protest to what is termed in the letter "propaganda" published to the effect that the livestock exchanges registered on the western markets are opposed to the marketing of co-operative shipments of livestock and the pooling of livestock.

The letter states that the exchange had wired the minister asking if he had been correctly quoted in recent interviews and that the following reply had been received from Mr. Motherwell:

"I have no formal interview to matter referred to, but did devote attention of press men that co-operative marketing in west had now become more common and popular, that at present livestock regulations did not permit the farmers pooling their livestock sales legitimately, then it might, and possibly would, be desirable to change such regulations."

The letter says the exchange "would be pleased to be added by you just what regulations oppose the marketing of co-operative livestock or the pooling of livestock."

The letter points out that practically all exchanges in the west operate under the same regulations; that there are "any regulations prohibiting the practices named, that the exchange would assist in removing them for good business reasons." In regard to the letter to the minister, the exchange states that the minister's statements would affect all the commission firms operating on the Winnipeg exchange.

## Tidal Wave In Burma

Death Toll Has Reached A Total Of 2,800

Rangoon, Burma.—The death toll of the recent cyclone and tidal waves on the coast of Burma has reached a total of 2,800, according to a report submitted by the commissioner of the district of Arakan.

It is feared that the total number of deaths may reach almost 4,000 in the affected regions.

Large property loss has been suffered through the area which was swept by the gigantic death-dealing, tide, which, he charged, was "undermining progress and development in the city." He criticized the organization for its refusal to grant the street railway men's union of the organization a board of conciliation in an effort to settle the present deadlock between the Winnipeg Electric Railway and the men. The traction company has refused to recognize the union or negotiate a new agreement with their employees who are affiliated with the O.B.U.

Relief work is progressing as well as possible, but it is said to be inadequate to meet the present situation.

## Canadian Envoy To U. S.

Appointment Is To Be Made By Senator Dandurand

Ottawa.—Senator Dandurand, government leader, replying to a question asked by Hon. J. A. Robb, minister of finance, said that the government intended to appoint a minister plenipotentiary to Washington. As to when the appointment would be made, he was under consideration. Senator Dandurand said there had been no correspondence between the Canadian and United States governments, and parliamentary reference to the appointment of an American ambassador to Ottawa.

## Will Not Receive Degree

Cambridge University Withdraws Proposal To Honor Ramsay MacDonald

London.—Cambridge University has withdrawn its proposal to bestow the honorary degree of Doctor of Laws upon former premier Ramsay MacDonald, and parliamentary chief of the Labor party.

Notification was given that there was no possibility of his acceptance of the degree of the university, and Mr. MacDonald intimated that he had no desire to receive a degree by majority vote.

## Foot and Mouth Disease

London.—A case of foot and mouth disease of cattle is brought into England in the carcasses of pigs imported from the continent by British factories which cure the meat of the pigs. Hon. Walter Gillies, minister of agriculture and fisheries, made this statement in answer to the question of agriculture of Middlesex County at the Guildhall.

## Missing Evangelist

Los Angeles.—The Los Angeles Times says it has learned through confidential but thoroughly reliable sources that Mrs. Minnie Kennedy, founder of Abnathu School, Mrs. Kennedy, missing evangelist, is negotiating with two men who declare they will return her. Mrs. Kennedy for the \$25,000 reward recently offered by Mrs. Kennedy.

## ALBERTA SCHOOL QUESTION GOES TO SUPREME COURT

Ontario.—Hon. Ernest Lapointe, minister of justice, announced in the house that the department of justice had in hand reference of the Alberta school question to the Supreme Court of Canada.

"I believe," said Mr. Lapointe, "that it is fair to all parties and in the interests of the country that the question will in this way be settled definitely and removed forever from the field of controversy."

Mr. Lapointe said the amendment made by the legislature of Alberta, "without our consent" to the natural resources bill suggested that the law of the province might differ from, or be in conflict with Section 17 of the Alberta Act. Other than the amendment would be useless and futile. The Alberta Act had stood as the constitution of the province for 21 years. "We cannot directly or indirectly, even in a tacit manner, acknowledge that its validity might be subject to question."

The government was prepared to take immediate steps for a reference to the Supreme Court. "We will submit the act and support its validity, and give an opportunity to those who question it to present their views," Mr. Lapointe said.

The government was prepared to take immediate steps for a reference to the Supreme Court. "We will submit the act and support its validity, and give an opportunity to those who question it to present their views," Mr. Lapointe said.

## Higher Favorable Trade Balance

Canada's Excess of Exports Over Imports Greatly Increased

Ottawa.—Canada's favorable balance of trade (the excess of domestic exports over imports) was increased to \$9,000,000 in the 12 months ending April 30, 1925.

In the 12 months ending April 30, 1925, domestic exports were \$125,000,000, imports \$95,000,000. Excess of exports over imports was \$30,000,000.

In the 12 months ending April 30, 1925, domestic exports were \$125,000,000, imports \$95,000,000. Excess of exports over imports was \$30,000,000.

In the 12 months ending April 30, 1925, domestic exports were \$125,000,000, imports \$95,000,000. Excess of exports over imports was \$30,000,000.

In the 12 months ending April 30, 1925, domestic exports were \$125,000,000, imports \$95,000,000. Excess of exports over imports was \$30,000,000.

## ALBERTA SCHOOL QUESTION GOES TO SUPREME COURT

Ottawa.—Hon. Ernest Lapointe, minister of justice, announced in the house that the department of justice had in hand reference of the Alberta school question to the Supreme Court of Canada.

"I believe," said Mr. Lapointe, "that it is fair to all parties and in the interests of the country that the question will in this way be settled definitely and removed forever from the field of controversy."

Mr. Lapointe said the amendment made by the legislature of Alberta, "without our consent" to the natural resources bill suggested that the law of the province might differ from, or be in conflict with Section 17 of the Alberta Act. Other than the amendment would be useless and futile. The Alberta Act had stood as the constitution of the province for 21 years. "We cannot directly or indirectly, even in a tacit manner, acknowledge that its validity might be subject to question."

The government was prepared to take immediate steps for a reference to the Supreme Court. "We will submit the act and support its validity, and give an opportunity to those who question it to present their views," Mr. Lapointe said.

## Many Injured In Gas Main Explosion

Weak Sense Given As Cause Of Accident In Los Angeles

Los Angeles, Calif.—Nine persons were injured, some seriously, when a sixteen-inch gas main exploded in the crowded east side of the city.

The gas that could be heard a mile distant, the blast ripped a gaping hole in the pavement 100 feet long and 10 feet wide, and killed the remains of a car, which was hurled into a dairy, smoldering less.

Six pleasure cars and three trucks, which were parked nearby, were lifted into the air and dropped, demolished and burning, into the street below.

Damages in excess of \$200,000 were caused by the explosion. It is believed, however, that losses will exceed that figure.

A weak sense in the big main was given as the cause of the blast.

## Cure For Leprosy

New Treatment Devised Meets With Great Success

Berlin.—A new treatment for leprosy has been devised by Prof. R. P. Kilduff, of the University of Dorpat, Estonia, who in an article in the German Dermatological Journal, announced that after many years of experimentation, he had succeeded in killing the leprosy germ by means of freezing.

Carbolic acid "snow" was applied to diseased tissue with the result that 16 patients treated, seven already having been discharged as totally innocuous to society, the article said.

## Will Not Be Candidate

Edmonton.—Ex-premier Herbert Greenfield has announced that he will not be a candidate in the Alberta general election June 28. He expects to take an active part in the campaign, addressing meetings on behalf of the U.P.A. candidates.

## Attempt To Criticize King George Quashed

London.—An address of thanks to King George for his proclamation concerning the state of emergency in connection with the strike was quashed in the House of Commons, 249 to 154.

An attempt to criticize the King's name of the Laborites, notably the speaker, Mr. P. H. P. was quashed. The speaker said the Laborites they could not bring the speaker's name into the discussion because what he had done was done on the advice of his ministers.

## Not Be Spoken

London.—An address of thanks to King George for his proclamation concerning the state of emergency in connection with the strike was quashed in the House of Commons, 249 to 154.

An attempt to criticize the King's name of the Laborites, notably the speaker, Mr. P. H. P. was quashed. The speaker said the Laborites they could not bring the speaker's name into the discussion because what he had done was done on the advice of his ministers.

## Calgary Candidates

Calgary.—For the five members to elect in the municipal representation in the city of Calgary, Liberals decided to place three candidates in the field. On the first ballot they chose H. C. McLeod, sitting member of the legislature, Mrs. Nellie McLeod, her wife and daughter, member of the legislature and daughter, member of the legislature.

The speaker said the Laborites they could not bring the speaker's name into the discussion because what he had done was done on the advice of his ministers.

## Liberal Conditions In Orient

Geneva.—Eighty-three thousand Japanese women work in the mines and across of them labor in the darkest depths. Japanese representatives told the International Labor Conference here.

This admission followed an assertion by Miss Margaret Hamilton, English labor worker, that working conditions in Japan, China and India were "intolerable."

## Finland Drydock Broken

Oslo, Norway.—A new \$400,000 government drydock here will shortly be completed. The gate is nearing completion at Narvik, Finland. Under the terms of the new contract, the gate will be the last contract to be before the party's committee, about the third week in August.

## No Action On Cattle Tariff

U. S. Legislation Not Possible Before Next Congress Meets

Washington.—Talk here in regard to the cattle tariff, growing out of Hon. W. R. Motherwell's statement to the House of Commons at Ottawa, is that there is no likelihood of any change in the present situation in the near future. It is pointed out that the tariff is not to be changed until the next session of the congress, which will be elected next November, but will not meet in regular session for a year and a half.

So far as the flexible tariff is concerned officials of the tariff commission point out that there is nothing before them on the cattle rates. While there has been action by some livestock interests on this side to let down the tariff as to feeder cattle other livestock interests are fighting the proposition.

With a congressional campaign on and with the agricultural situation in the middle west, and such unsatisfactory there is little or no prospect, it is felt here for opening up the cattle tariff question.

## New Polish President

Will Soon Step Aside In Favor of Pilsudski Say Politicians

Warsaw.—Polish politicians who are not the political ally of Professor Ignacy Moscicki—variously known as a rebel's son, a world famous inventor, and once a fugitive from the law—have decided a climax in his election to the presidency of Poland, in which office he will fill the place of Jozef Pilsudski's nephew.

Warsaw received news of his election with a claim that was almost of interest. Moscicki will be president of the Polish Republic.

The capital—enough to provide the blame for any mistakes of the transition period—then he will decide whether he will accept the position. He has been re-elected to the office, and Pilsudski will take over the office along with the power which is really will be his all along.

## Wembley Will Be Sold At Auction

No Private Tenders Have Been Received By Liquidators

London.—Wembley is to be sold. The liquidators, after vainly endeavoring to get a bid for the great exhibition grounds and buildings by private sale, have decided to put the place up at public auction. The site covers about 132 acres, and the sale will include the Palace of Engineering, the Palace of Industry, as well as the Stadium, which will accommodate 100,000 people. Several of the Dominion pavilions will also be included in the sale.

## Is Offered Post Of Governor-General

General Offered That Lord Willingdon Has Accepted

It is now officially admitted that Lord Willingdon has been offered the governor-generalship of Canada, and it is generally believed he has accepted the post. He will return from his present duties by way

## WIPE OUT THE PARTY SYSTEM

In 1921 J. T. Shaw, present leader of the Provincial Liberal Party, stated that "in the wake of the party system had followed corruption." Mr. Shaw has changed since 1921, but the party has not. We cannot forget what happened in Northern Alberta so recently as last October, in the Dominion General Election.

Alberta in the past five years has had a Government in power, which is acknowledged, even by its opponents, to have been honest and sincere. It has been accused of inaction and extravagance, but these assertions are disproved by evidence of the improved financial and administrative conditions in provincial affairs.

The party system is breaking down all over the world.

The genius of Albertans has evolved a system immeasurably better, a system which has functioned satisfactorily during the past five years. It substitutes co-operation for opposition in the administration of Provincial affairs. Do not be tempted by specious argument to go back to the evils of 1921.

## THE ESTABLISHED ANNUAL EVENT

### Vulcan Town Council and Citizens

invite you to celebrate with them in

### Vulcan Dominion Day 1926

Baseball, Horse Racing, Football, Athletics—Everything

## Local and General

Champion baseball team plays at Lethbridge on Friday.

Chas. McLean and W. E. Watkins are attending Masonic Grand Lodge at Banff.

Mrs. A. Diemer returned from Calgary on Sunday, where she had been for medical attendance.

Since 1920 Canada's contributions to the expense of the League of Nations totalled \$921,559.

There are only 147 unemployed in all Paris, compared with hundreds of thousands in England and Germany.

Born—At the hospital in Vulcan, on June 1st, 1926, to Mr. and Mrs. Clyde Matlock, of Champion, a daughter.

The 1926 convention of the Alberta-Montana highway association will be held in Lethbridge in August.

Ev. Lutheran services will be held in the United Church on Sunday, June 13th, at 3 p.m. The public cordially invited.

No more party politics says Hon. George Hoadley, who has played more party politics than any man in Alberta—Lethbridge Herald.

Mrs. G. M. Campbell was the hostess on Tuesday afternoon at a tea given in honor of Mrs. E. Mason, who is leaving shortly for Drumheller.

Rev. and Mrs. Mossner left for Warner on Tuesday morning to visit Rev. and Mrs. Jordan, the former being an old classmate of Mr. Mossner.

H. E. Gill shipped a carload of hogs to Calgary on Wednesday which was the most valuable carload bought here since 1920, aggregating \$2500.00.

## Extraordinary Value Offered in LADIES' WEAR!

## Canning Season is Right Here

This week will see B. C. Strawberries at their best. The crop is reported to be large and the fruit in fine condition, the price lower than previous years.

Leave your orders here. You will get the best fruit at the best price.

Fruit Jars, Rubber Rings, Certo and all canning necessities in stock

## McCullough Bros.

A church of Palestinian marble, costing more than \$2,000,000, has just been built in the Garden of Gethsemane, Jerusalem.

Champion lost to Blackie at the latter point on Sunday before a large crowd by the awful score of 14-0, the figures being a fair indication of the play.

Preserving strawberries are here. The price has hit the lowest mark and berries are in best condition. Next week will be absolutely the last.—B. M. Roberts.

Mr. and Mrs. G. E. Voisey left on Monday for Vancouver and other coast points. The trip is being made by motor car and a month will be spent in the trip.

When purchasing goods to make a new garment, you will find it wise to be sure you are getting the "real thing." Sometimes a woman makes up a new material supposing she has something good, but finds out to her sorrow later that she was fooled into buying a make-believe fabric. You can easily test the purity of silk and wool by burning a sample. Cotton burns easily, with almost no color, and leaves very little ash. Wool burns slowly, smells like scorched feathers or hair, and leaves much ash. Pure silk burns readily and curls up into a hard, shiny, bead-like ash. Auterated silk will hold the original shape of the cloth when burned, but will fall to pieces when touched.

## CHAMPION Beauty Shoppe

Marcelling, Haircut, Shampooing, Henna Packs, Facials, Clay Packs, Scalp Treatments, Eyebrow Arching, Manicuring.

Electricity used for Heat and Treatments.

**Fridays and Saturdays**

Herbert Gill**

# Capt. J. T. Shaw's MANIFESTO

1. Immediate examination of our provincial taxation system in order to adjust on sound principles of taxing powers between the province and the municipalities.

2. Decentralization as far as practicable in the services of government, so as to secure more efficient service at less cost.

3. An immediate and long overdue reduction in taxation with special tax adjustments for sub-urban areas not suitable to intensive production.

4. A serious and determined effort to make expenditure balance income every year, not every pre-election year only, as at present.

5. The budgeting of an adequate sum every year, on the sinking fund principle to effect the retirement of our public debt within a reasonable time.

6. Realizing the primary importance of the agricultural industry, the Liberal party pledges itself to assist that industry in every reasonable way, by ensuring that co-operative marketing enterprises get a square deal, secure from unfair competition and from all partisan influence and all discrimination; by the provision of adequate facilities for marketing the farmers' produce, by establishing, in close co-operation with the Dominion government, a system of rural credits based on some sound principles, by vigorous demand before the Railway Commission for needed reductions in railway and express rates and for the elimination of discriminatory freight rates, and by jealously guarding the farmers' interests in the western route, not only by zealous watching but also by proper representation.

7. The Liberal party undertakes to inspire a real leadership in educational affairs and will be prepared to make more liberal financial provision for that essential service. Also will use every endeavor to have the federal government not only continue but increase its grants for technical education. In addition there must be a closer co-ordination of the agricultural work undertaken by the university and agricultural and other schools in the province.

8. The Liberal party pledges itself to encourage an expansion in the hospital and nursing service of the province in order to promote the highest standard of public health.

9. The Liberal party has assisted in every possible way to secure the return to the province of its natural resources. This should soon be realized. If honored with public confidence the Liberal party proposes to undertake the prompt and efficient development of these resources in the public interest along sound business lines.

10. When entrusted with office the Liberal party will engage a small body of experts to examine the sources of power in the province for the purpose of evolving if possible a practical power scheme to supply cheap power to our communities for industrial and agricultural purposes.

11. The Liberal party offers a redistribution according to a definite plan on the principle of representation by population, paying however, due regard to the more sparsely settled portions, geographical area and community of interest; it being understood that such redistribution will substantially reduce the number of provincial ridings.

12. The Liberal party proposes to encourage a policy of co-operative effort to all classes and their representatives in the interests of democratic legislation.

13. The Liberal party strongly favors and approves of a co-operative effort between the Dominion and Provincial governments for the purpose of securing old age pensions. The plan which has received second reading in the House of Commons is approved.

14. The Liberal party is responsible for every advance made in securing to women a larger measure of equality in political and economic matters. That policy must be continued until in every practicable way, women enjoy the fullest equality with men.

15. The Liberal party offers to the electors a policy of constructive effort and of action, and a government "of all the people, by all the people and for all the people."

**VOTE FOR JAS. McNAUGHTON**
